

TABLEAU BASICS

☒ Q1. What is Tableau & Why Preferred?

Answer:

Tableau is a powerful data visualization tool used to analyze and present data in an interactive and graphical format.

Why it is preferred:

- Easy to use (drag-and-drop interface)
- Fast data processing
- Creates interactive dashboards
- Better visualization than Excel

Industries:

- **Retail** → Analyze sales and customer behavior
- **Healthcare** → Track patient data and performance

Use Case:

In retail, Tableau helps identify which products are selling the most and which are not, helping businesses improve sales strategy.

☒ Q2. Types of Fields & Examples

a) Types of fields:

- **Time-based** → Order Date
- **Geographical** → State, Region
- **Numerical** → Sales, Profit

b) Dimensions (any 4):

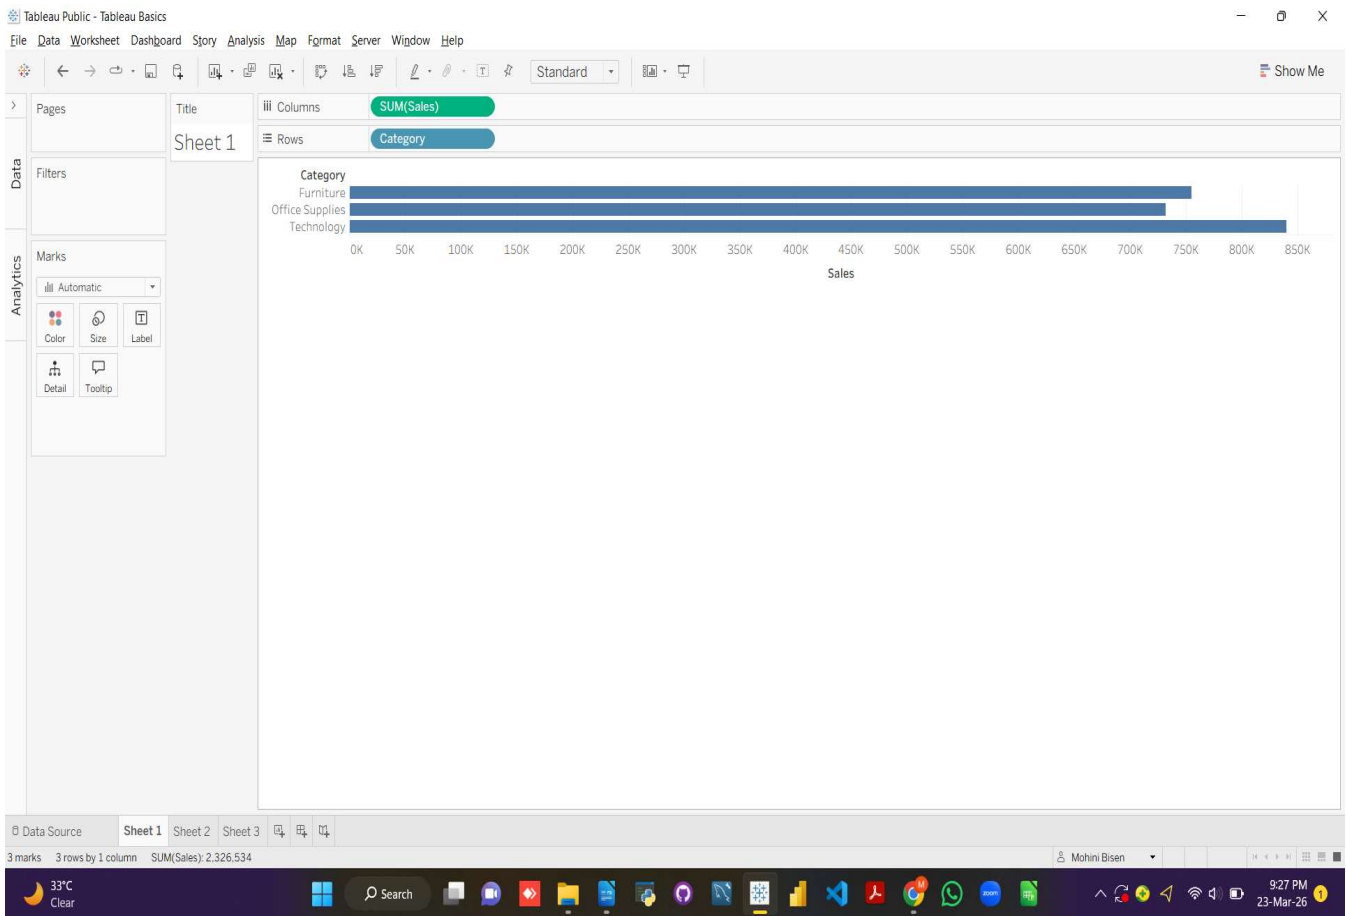

- Category
- Sub-Category
- Region
- Customer Name

Measures (any 4):

- Sales
- Profit
- Quantity
- Discount

☒ Q3. Bar Chart (Sales by Category)

- **Rows:** Category
- **Columns:** Sales
- **Aggregation:** SUM (Total Sales)

☑ Q4. Sales vs Profit Insight

Insight:

- High sales doesn't always mean high profit
- Some categories may have high sales but low profit

Chart for Profit by Sub-Category:

- Drag **Sub-Category** → **Rows**
 - Drag **Profit** → **Columns**
 - Use Bar Chart
-

☑ Q5. Line Chart (Sales Trend)

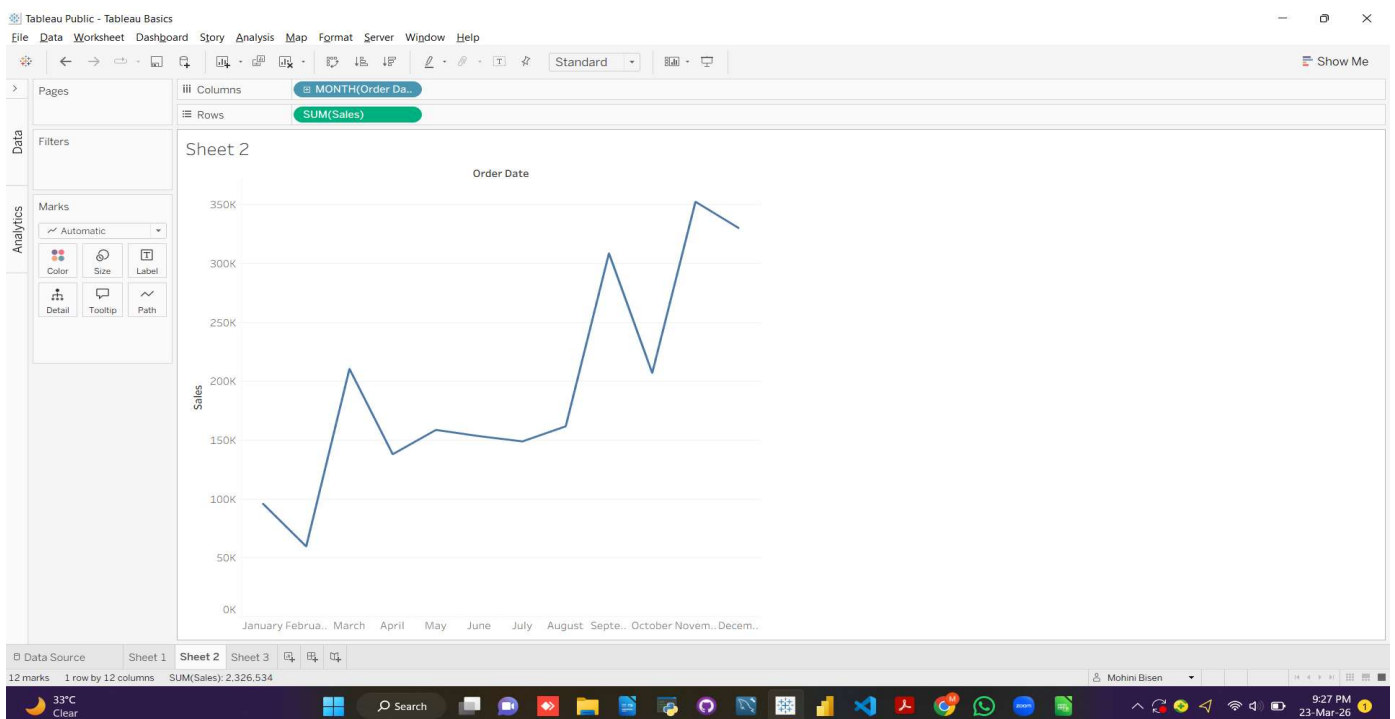

- Use **Order Date** → **Columns**
- Use **Sales** → **Rows**
- Select **Month**

Why Month?

- Gives detailed trend analysis

Why Line Chart?

- Best for showing trends over time
- Easy to track increase/decrease

☑ Q6. Apply Filters

Steps:

1. Drag **Region** → **Filters shelf** → Select “West”
2. Drag **Category** → **Filters shelf** → Select “Technology”

☞ Shelf used: **Filters Shelf**

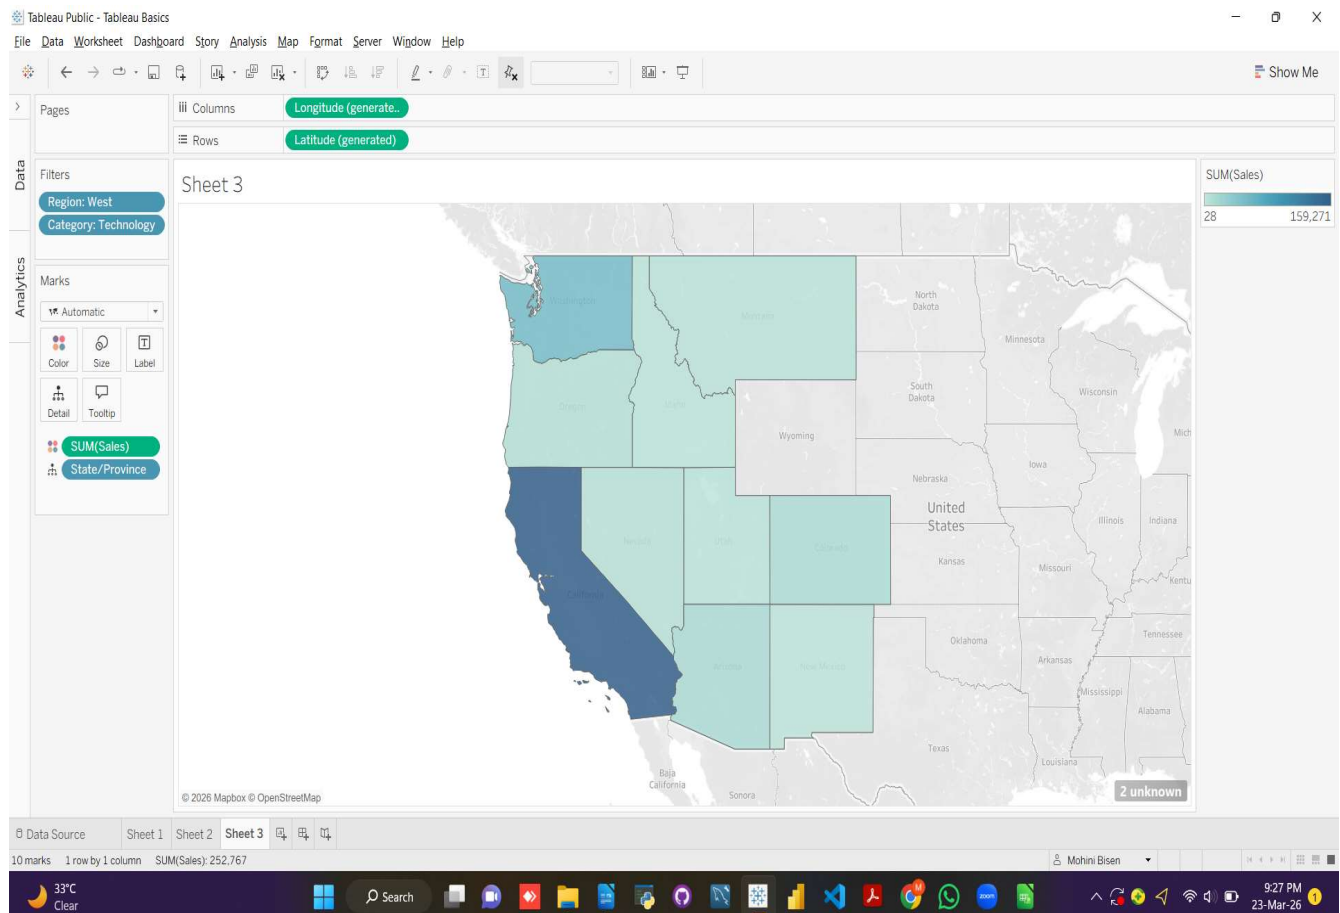

☑ Q7. Geographical Analysis

Importance:

- Helps understand regional performance
- Identify high/low performing areas

Map Creation:

- Drag **State** → **View**
- Drag **Sales** → **Color/Size**

☒ Q8. Worksheet vs Dashboard

- **Worksheet:** Single chart
- **Dashboard:** Multiple charts in one view

Why Dashboard is useful:

- Combines multiple insights
 - Helps in better decision-making
-

☒ Q9. Tableau Prep

Tableau Prep is used for data cleaning and preparation.

Importance:

- Cleans messy data
- Improves data quality

Steps:

Remove Null Values:

- Use filter → Exclude null values

Remove Duplicates:

- Use “Remove Duplicates” option

Change Data Types:

- Click field → Change data type (String, Number, Date)
-

☒ Q10. Retail Manager Questions

a) Charts:

- Highest profit → Bar Chart
- Region performance → Map or Bar Chart
- Sales over time → Line Chart

b) Key Insight:

☞ Technology category may generate highest profit

c) Business Use:

- Focus on profitable products
- Improve weak regions
- Plan future sales strategy
